## ROMAX<sup>®</sup> Compact

Battery powered compact hydraulic press tool, 12 V for pressing of fittings up to Ø 40 mm (plastics) and Ø 28 mm (metal)

### FAST

Only 5,8 seconds for one joint (M28 VA)

### COMPACT

380 x 70 x 90 mm and 2,56 kg (without jaw)

### STRONG

25% more power with 12 V-battery (rechargeable)

#### Compact jaw with 3-Bolt-System

Synchronism enables one-fingered opening of the jaw

Cannot be unintentionally opened, since a 180° turn is required

Safety locking mechanism

#### CFT<sup>®</sup>-Technology (Constant Force Technology) for constant axial 19kN shearing force

High degree of press reliability over 10,000 pressing cycles

Maximum user safety as press cycle can be instantly interrupted

Easy-to-reach emergency stop switch

...for basic electronic tool – Activate under [www.rothenberger.com](http://www.rothenberger.com)

Rigid housing supports for workbench usage

Fast, compact, strong: Guaranteed joints up to Ø 40 mm (plastics)

Jaw holding fixture rotates through 270°

Compact jaw is compatible with other 19-kN-/3-Bolt-Systems

## Product Profile

### ADVANTAGE

#### Performance Characteristics

- Working independent of mains with its rechargeable battery drive
- Permanent machine monitoring with LED display for battery charge level and inspection interval after 10,000 press cycles, as well as safety start control if battery empty

#### Ergonomics

- Appropriate for general use due to low weight (2,56 kg without jaw)
- Balanced weight distribution, with centre of balance in handle reduces exhaustion
- Secure grip in all working positions e.g. working in a confined position and working overhead

#### Work safety

- Easy-to-reach emergency stop switch: Immediate drop of oil pressure, piston automatically returns

### TECHNICAL DATA

<b>Dimensions:</b>	only 380 x 70 x 90 mm
<b>Pressing joints:</b>	up to Ø 40 mm (plastics), up to Ø 28 mm (metal) rotatable through 270°
<b>Jaw holding fixture:</b>	
<b>Weight:</b>	approx. 2,56 kg (without jaw)
<b>Motor:</b>	powerful 12 V-motor
<b>Battery:</b>	NiMH 1,9 Ah

Included in all sets:  
Plastic case, rechargeable battery and rapid recharger.

## Compact Jaw

**High degree of elasticity and expandability**

Special hardening process

**Ideal for use under harsh conditions on site**

Long-term corrosion protection

**Compact jaw with 3-Bolt-System**

Synchronism enables one-fingered opening of the jaw

### SERVICE DIRECTION

Jaws "like all tools" are subject to abrasion when used. In order to guarantee an operational reliability of the jaws, it is recommended that they are serviced together with the press tools once a year. The jaw should be regularly examined for damage. Use of the jaws must be aborted once any damage is recognisable, and must be sent to an authorised ROTHENBERGER service center for an evaluation of their usability.

During the inspection, the jaws are tested for operational and functional safety and the wearing parts (e.g. springs) are replaced. You will get back a jaw tested for functional and operational safety, including a 1 year guarantee. Have your jaws inspected by an authorised ROTHENBERGER testing centre no later than 1 year after purchase, or after 10.000 pressings (whichever comes first), and regularly repeat this inspection after 1 year or 10.000 pressings thereafter.
